

GraphicFlo™

GraphicFlo is a unique digital product featuring excellent formation, a super smooth finish and 96 brightness. This unique combination puts GraphicFlo in a class of its own for today's variable print technologies.

GraphicFlo's uniform print surface creates sharp, crisp images and text on a variety of digital web equipment including systems with inline binding treatment capability. And its super smooth finish resembles that of a higher priced coated product – enhancing any design requiring bold colors and solid blacks. With laser, ink jet, and pre-print offset capabilities, GraphicFlo is a proven performer in high volume transactional and direct mail applications.

GraphicFlo meets the global standards of the Forest Stewardship Council™ (FSC®). The FSC product label allows consumers worldwide to recognize products that support responsible forest management. FSC certification is supported by leading environmental groups, such as Rainforest Alliance and WWF.

Available in 24 lb. and 28 lb. basis weights, processed and unprocessed rolls, GraphicFlo is the leading digital marketplace paper of choice.
